## Viscose OE ( open-end ) yarns:

raw white and package dyed coming from Legs modern dyehouse.

Dear Customers,

We are very pleased to inform you that our company offers viscose OE ( open-end ) yarns: raw white and package dyed coming from Legs modern dyehouse.

Viscose OE is a very fashionable yarn now, especially in the sector of circular knitted single jersey fabrics, addressed to the market segment – knitted women’s clothing.

Raw white yarns are produced for us by one of the biggest chinese producers of this kind of yarns.

This company owns the most modern spinning machinery for production of OE yarns, spinning lines were produced in Germany and Japan.

Raw white yarn is of very high quality and it has relatively small amount of thick & thin places – low number of imperfections.

Since we have been selling this yarn for four years now we have no claims and all products made, reached top level quality. There have never been stripes on the fabrics and knitting process went smoothly.

The Customers we sell these yarns to, mutually confirm that the quality of this chinese raw white yarn is on the same level with yarns produced by european viscose OE spinners.

Additionally our advantage is that we keep a very big warehouse quantity for raw white yarns - it minimizes the risk of supplies discontinuity.

Of course not only we have knitted fabrics in fashion, that are made out of viscose raw yarns, dyed for one color. For last couple of years, elastic viscose single jersey fabrics knitted with different dyed yarns for multicolour stripes or jacquard multicolour fabric, is a ‘must’ in women’s fashion of blouses and dresses.

We dye viscose OE yarns in our modern dyehouse. Our machinery consists of modern German Thies dyeing machines and SSM Swiss yarn winders/rewinders. This equipment ensures very equal yarn density which in turn results in high quality of yarn dyeing.

**Our dyehouse offers dyed viscose OE (open-end) in three bath sizes :**

- 500 kg
- 280 kg
- 140 kg

We have enclosed with this covering letter, the sample book where you will find swatches of circular knitted fabrics made out of our yarns.

The swatches, we believe, will reconfirm high quality of the raw white yarn itself and of our dyeing process. Our planning production capacity is a range of counts 10 Ne – 40 Ne single and 10 Ne x 2 – 40 Ne x 2 double.

**Actually we have in stock:**

- 30 Ne x 1
- 36 Ne x 1

**Technical specification of yarn is:**

- |                         |       |
|-------------------------|-------|
| • tenacity              | 10.90 |
| • Yarn CV               | 13.80 |
| • thin places ( -50% )  | 14.00 |
| • thick places ( +50% ) | 29.00 |
| • neps ( +200% )        | 120   |

We hope these samples will be an inspiration for you to design fashion fabric and it will be a good start for our cooperation in this area.

If you have any technical questions , please do not hesitate to contact our representatives for your area . We would like to wish you success in your business and we would be happy if we could be a part of it!

Warm regards,  
The LEGS Team
